17:00 - 20:00 - FSDI 101 Session #2 Ch 34

- HMTL use tags <element> some text <\element>
- CSS (inline, internal, external)

```
selector{
    property:value;
}

p{
    color:blue;
}
```

  - external needs to be linked with the HTML (in the HTML file) using the name of the CSS file.

```
<link rel="stylesheet" href="mystyle.css">
```

- CSS has three selectors: tagname, class, ~~id.~~
  - tagname
  - .classname
  - #idname
- HTML comments <!-- -->
- CSS comments /* */
- Installed the live server
- VSC shortcuts: (for mac users replace Ctrl by command)
  - Ctrl + / (comment lines)
  - Ctrl + S (save a file)
  - link:css (create the link css line in html)
  - Ctrl + X (cut a line)
  - Ctrl + Z (undo)
  - Ctrl + C (copy)
  - Ctrl + V (paste)
